Re: SWMU 2 Sampling Report, Naval Air Station Key West, Florida

Dear Mr. Hayworth:

The Department has completed the technical review of the SWMU 2 Sampling Report dated November 2010 (received January 18, 2011 via email) and has the following comments:

Page 2-2, 1st paragraph: In this paragraph Naval Air Station Key West (NAS Key West) explains the monitoring plan for this site from 2000-2009. The Navy states that, "In 2007, the analyte list was reduced from a larger group of analytes". The new list of analytes that resulted from this reduction is never provided in this report. Can the Navy please provide the new revised list?

Page 2-2, 2nd paragraph: This paragraph discusses the recommendation made to increase the boundaries of this site due to the data that was collected in 2006 after the storm surge event. The Department concurred with this recommendation and feels that the expansion of this site will need to be dealt with in a timely fashion. The partnering team is presently compiling a list of sites to be added to the Hazardous and Solid Waste Amendment (HSWA) permit and the Department feels that the changed boundaries for this site should be added as well.

If I can be of any further assistance with this matter, please contact me at (850) 245-8998.

Sincerely

Tracie L. Bolanos
